## Table of Contents

Acknowledgements	3
Introduction	4
Goal 1: Reducing New HIV Infections	4
Objective 1a. By 2021, 90% of people living with HIV will know their serostatus.	4
O1a. Strategy 2: Increase community awareness of the importance of HIV testing, including awareness of testing sites.	8
O1a. Strategy 3: Increase the number of rapid HIV testing locations available in Nevada	11
Objective 1b. By 2021, reduce by 25% the number of new HIV diagnoses.	14
O1b. Strategy 1: Increase education and access to PrEP and PEP	14
O1b Strategy 3: Provide community-wide harm reduction strategies, including condoms and other harm reduction materials availability and utilization	24
Goal 2: Increasing Access to Care and Improving Health Outcomes for PLWH	29
Objective 2a. By 2021, increase to 85% the percentage of people newly diagnosed with HIV who have been linked to a provider within the first 30 days.	29
O2a. Strategy 1: Improved communication between organizations	30
O2a Strategy 2: Link hard-to reach populations to providers to provide continuity of care for PLWH	32
O2a Strategy 3: Facilitate patient readiness to participate in their care and management of HIV	35
Objective 2b. By 2021, increase by 20% the percentage of clients in care needing mental and/or behavioral health services who went to their first appointment.	36
O2b. Strategy 1: Improve communication among organizations and between clients and organizations	36
O2b. Strategy 2: Recruit more mental/behavioral health providers	37
O2b. Strategy 3: Professional Development activities	39
Objective 2c. By 2021, 80% of people diagnosed with HIV, who have had a medical visit each year for the past two years, will be virally suppressed (VL <200).	41

O2c. Strategy 1 Address treatment adherence of PLWH through educational strategies and evaluation.	42
O2c. Strategy 2 Provide education and information regarding uninterrupted access to and proper use of medication	48
O2c. Strategy 3 Educate both client and provider stakeholders regarding the importance of routine viral load testing and tracking of viral load data	50
Objective 2d. By 2021, reduce to 20% the incidence of STIs in HIV infected persons in care.	52
O2d. Strategy 1 Conduct provider education and disseminate recommendations regarding routine screenings for STIs	52
O2d. Strategy 2 Conduct public and individual education for PLWH and newly diagnosed regarding STIs	54
O2d. Strategy 3 Develop quality control measures to improve clinical care and outcomes	55
Objective 2e. By 2021, increase number of providers screening for HIV associated comorbidities by 20%.	57
O2e. Strategy 1 Conduct Provider education and recommendations regarding routine screenings for comorbidities	57
O2e. Strategy 2 Conduct Public and individual education for PLWH and newly diagnosed regarding common HIV comorbidities	58
O2e. Strategy 3 Develop quality control measures to improve clinical care and outcomes	60
Goal 3: Reducing HIV Related Disparities and Health Inequities	63
Objective 3a. By 2021, reduce disparities in the rate of new diagnoses by at least 15 percent among Nevada’s priority populations.	63
O3a. Strategy 1: Engage the community in order to find out how to best reach priority populations	65
O3a. Strategy 2: Implement HIV prevention public education through media campaigns and social network strategies to target populations.	65
O3a. Strategy 3: Increase provider and organization capacity to test at sites in their communities	67
Objective 3b. By 2021, increase to 85% the percentage of newly diagnosed with HIV among Nevada’s priority populations who have been linked to a provider within the first 30 days.	68
O3b. Strategy 1: Improve first contact and point of access to care for PLWH who experience multiple “layers” of stigma (e.g., HIV infected, gay, minority, female, transgender, IV drug user, etc.)	68
O3b. Strategy 2: Improve the ability of PLWH in underserved or high risk groups to navigate the HIV system of care.	70
O3b. Strategy 3: Improve the accessibility of information for PLWH in underserved or high-risk groups.	71
Conclusion	74
Appendix A: List of Acronyms	76

# Nevada Integrated HIV Prevention and Care Plan 2017-2021: 2019 Annual Monitoring Report

## Introduction

The Nevada Integrated HIV Prevention and Care Plan 2017-2021, including the Statewide Coordinated Statement of Need, was developed in response to the guidance provided by the Centers for Disease Control and Prevention (CDC) and the Health Resources and Services Administration (HRSA) and submitted in September 2016. The UNR HIV Prevention and Care Plan Monitoring Team has met with the Integrated HIV Prevention and Care Plan Monitoring Workgroup regularly since 2016 to monitor and track plan activities. Representatives from the Ryan White Parts A, B, C, D, F, the Prevention Program, and their subrecipients are asked to provide updates and data regarding the Plan strategies and activities twice a year through an online reporting system. This 2019 Annual report describes the status of plan activities and interventions through December 2019, progress made towards Nevada's Integrated Plan goals and objectives, and suggested actions to further progress.

### Key:

Green:  
Activity completed.

Yellow:  
Activity in process, ongoing.

Red:  
Activity not started.

## Goal 1: Reducing New HIV Infections

Objective 1a. By 2021, 90% of people living with HIV will know their serostatus.

**Figure 1. Estimated percentage of PLWH who know their serostatus, Nevada and United States, 2014-2016**

Centers for Disease Control and Prevention. CDC HIV Prevention Progress Report, 2019. Accessed September 30, 2019. On the Web: <https://www.cdc.gov/hiv/pdf/policies/progressreports/cdc-hiv-preventionprogressreport.pdf>

**O1a. Strategy 1: Increase number of high-risk people tested in Nevada, based on data.**

		<b>Activity/Intervention</b>	<b>Metrics</b>	<b>2018 Status</b>	<b>2019 Status</b>	<b>2020 Status</b>	<b>2021 Status</b>
	2017	Incorporate review of targeted testing data into the Community Planning Groups (CPGs) and include a representative from the Northern Nevada HIV Prevention Planning Group on the Southern Nevada HIV Prevention Planning Group and vice versa.	Workgroups formed to include members of HPPG and local health districts	To continue progress on reducing new HIV infections, the two HIV Community Planning Groups (CPGs) serve as the targeted testing workgroups in the North and South.	Completed	Completed	Completed
	2017	Recruit substance abuse and mental health representatives to targeted testing workgroups.	# of representatives recruited	Both CPGs have substance abuse and mental health representatives.	Completed	Completed	Completed
	2017-2021	Review available HIV testing data (where testing is conducted and where the positives are being found).	Statewide testing data compiled and analyzed	# of HIV tests conducted: AFAN: 131 tests (5 positives) HOPES: 1,864 tests (11 positives) SNHD: 17,640 tests (217 positives) Huntridge: 1,152 tests (55 positives) Trac-B: 378 tests (5 positives) WCHD: 2154 tests (5 positives)	<b>Test:</b> AFAN: 87 (39+48) China Springs: 93 (44+49) CCC: 340 COMC: 336 New Frontier BH: 383 (222+161) Nye County HHS:0 Ridge House: 145 (50+95) Rural NV Counseling: 50 Trac-B/ NARES: 285 (107+178) VITALITY CC: 178 (51+127) Vitality Elko: 51 (51+0) WestCare:116 (65+51) HOPES: 884 (884+ 0) SNHD: 18,815 (8362+ 10453) UMC:0 WCHD: 2,068 (1046+ 1022)  <b>Positives:</b>		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					AFAN: 2 (1+1) China Springs: 0 Com Counseling: 2 COMC: 0 New Frontier BH: 0 Nye County HHS: 0 Ridge House: 1 (0+1) Rural NV Counseling: 0 Trac-B/ NARES: 0 VITALITY CC: 0 Vitality Elko: 0 WestCare: 0 HOPES: 3 SNHD: 149 (106+ 43) UMC: 0 WCHD: 6 (5+1)		
	2017	Establish baseline for testing among priority populations	Baseline data compiled and analyzed	This data on priority populations needs to be submitted to the plan monitoring team.	Preston Tang is working on getting some data from 2016 on number of tests conducted for clients completing a risk profile.		
	2018	Development of a targeted testing strategy based on data results	Nevada targeted testing strategy developed and adopted	HOPES: Substance abuse, Homeless SNHD: Substance abuse, MSM, Youth and Young Adults, Sexually active heterosexual WCHD: Substance abuse, MSM, Sexually active heterosexuals, youth Huntridge: Mental health, Substance abuse Trac-B: Substance abuse, Injection drug users	Did not develop or adopt any new strategies in this reporting period: AETC SNHD Trac-B WCHD  Substance abuse: HOPES  Mental Health: HOPES  Priority populations: HOPES (Youth, STI screening- higher risk, heterosexual, LGBTQ)		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2019-2020	Targeted testing strategy implemented	Testing among priority populations to increase 10% over baseline each year implemented	SNHD: Substance abuse (285 tests), Priority Populations (17,357 tests) WCHD: Substance abuse (87 tests), Priority Populations (2,154) Huntridge: Mental health (unknown), Substance abuse (unknown) Trac-B: Priority Populations (378 tests)	SNHD: Substance Abuse:255 (168+ 87) Priority Populations: 14,135 (7862+6273)  Trac-B SA: 285  WCHD: PP: 1,046  CCC: PP: 146 MH: 194 SA: 146  New Frontier: SA: 161  Ridge House: SA: 95  Rural NV Counseling: SA: 50  Vitality Carson: SA: 127  WestCare NV: MH: 40 SA: 40 PP: 11		
	2021	Strategy and testing campaign evaluated for effectiveness	Summary report with numbers tested, numbers tested positive,	Summary report with individuals tested: HOPES SNHD WCHD AFAN	Summary report with numbers of individuals tested: AFAN HOPES SNHD

			and percentage receiving test results  Distribution of report	Huntridge  Summary report with individuals testing positive: HOPES, SNHD, WCHD, AFAN, Huntridge  Summary report with % of individuals receiving test results: HOPES, SNHD, WCHD, Huntridge  Notes: Numbers are presented at SNHD's Board of Health meetings	Trac-B  Summary report with individuals testing positive: AFAN HOPES SNHD Trac-B WCHD  Summary report with % of individuals receiving test results: AFAN SNHD WCHD		

#### Suggested Actions

- Share numbers of positives by specific priority populations in order to track progress. (i.e., number tests and number of positives by location for each priority population.
- Continue communication between the north and south planning groups.
- Maintain substance abuse and mental health representatives in Southern and Northern Nevada.
- Continue to evaluate testing strategies and campaigns and make adjustments as needed.

#### O1a. Strategy 2: Increase community awareness of the importance of HIV testing, including awareness of testing sites.

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017	Collect data from the population on baseline awareness of importance and availability of HIV testing	Report of the results	Baseline needed	Baseline needed		
	2018	Develop comprehensive statewide media and marketing campaign across multiple platforms	Campaign developed and approved by the CAB	HOPES: Advocating for universal testing and knowing status. Utilizing awareness days.  SNHD: Twitter, Facebook, webpage,	Media campaigns: AFAN: Safe sex campaign (with information about our testing services). Know Your Status campaign, Free HIV Testing Ad	A marketing campaign will be implemented primarily in Las Vegas as part of CDC EHE work, spearheaded by UNLV.	

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
				<p>participation in HIV awareness days/weeks, collaboration with HIV consortium.</p> <p>WCHD: Act Against AIDS</p> <p>AFAN: General information with emphasis on the fact that HIV testing is free at agency and testing location sites</p> <p>Trac-B: Facebook, Instagram, Reddit to encourage syringe exchange program and testing for HIV/Hep C regularly</p>	<p>HOPES: National HIV Testing Day</p> <p>SNHD: Posts on social media regarding National HIV Testing Day as well as other HIV awareness days, information about testing as part of PrEP academic detailing packets</p> <p>SNHD OEDS has a presence on Facebook, Twitter, and Instagram, managed both by our office staff and SNHD Public Information Office. On these sites, we can provide testing venue information, safer sex education, and respond to questions from the community</p> <p>Trac-B: National HIV testing day</p> <p>WCHD: Used Act Against AIDS Campaigns of "Doing It", "Let's Stop HIV Together", "Start Talking, Stop HIV"</p> <p>Platforms:</p> <p>Facebook x5</p> <p>Twitter: x3</p> <p>Instagram:x3</p> <p>Dating App: x1</p> <p>YouTube: none</p> <p>Radio: none</p> <p>Newspaper: x2</p> <p>Other: Flyers, interviews</p>		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2019 - 2020	Media buys and placement across multiple platforms. Website/phone app with updated testing information available	At least 5,000,000 duplicated impressions throughout the state of Nevada		<p>The State of Nevada utilizes this website <a href="https://endhivnevada.org/">https://endhivnevada.org/</a> to publicize HIV Testing and various CDC Social Marketing Campaigns. "Free HIV Testing Locations In Nevada," are on the website <a href="https://endhivnevada.org/free-hiv-testing-locations-in-nevada/">https://endhivnevada.org/free-hiv-testing-locations-in-nevada/</a></p> <p>SNHD OEDS has a presence on Facebook, Twitter, and Instagram, managed both by state HIV office staff and by SNHD Public Information Office. These are used to provide testing venue information, safer sex education, and to respond to questions from the community. SNHD Social Media report for 2019: 14 Instagram with 88 Followers; Twitter: # of followers increased from 409 on 1/1/19 to 418 on 12/31/19; there were 104 total tweets for the year with 78,150 tweet impressions.</p> <p>WCHD engaged the community about HIV prevention through social media posts, using CDC messaging of the</p>	More marketing will be coming out in 2020-21 from the End the Epidemic efforts.	

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					campaigns “Let’s Stop HIV Together” and “Doing It.” Social media posts (115 posts) led to 24,940 exposures. The SAPTA HIV Testing Facilities conducts marketing of its testing hours (locally – Especially the rural locations). They are not required to publicize or track how their publicity efforts.		
	2021	Evaluate the effectiveness of the campaign to key populations	Report of results	Need to Identify Question Reporting Tool	Not applicable yet		

#### Suggested Actions

- Coordinate with the EHE UNLV Team as they gather data through focus groups related to marketing campaigns.
- Review evaluation metrics and check current status of marketing campaigns to see progress.
- Review various campaigns in place through various agencies across state to understand the statewide coverage and content.
- Identify any gaps there may be in content and coverage of campaigns.
- Work on developing a coordinated comprehensive statewide media and marketing campaign in collaboration with partners around the state. UNLV is starting this with focus on LV because of funds directed there. Increase campaign to statewide efforts if another CDC EHE funding is received.
- Use additional Ending the Epidemic funding to conduct more work in this area.

#### O1a. Strategy 3: Increase the number of rapid HIV testing locations available in Nevada

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2021	Enhance, develop and evaluate state training and certification process for new testing sites	State certification for HIV testing adopted	No organizations reported receiving state certification for HIV testing in 2018.	WCHD has new 5 rapid testing sites.  Individual certifications: China Springs: 5 CCC: 12 Ridge House: 2 Rural NV: 3 Trac-B: 3 Vitality Elko: 6 HOPES: 2 SNHD: 13		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2018	Develop and administer train the trainer	# of trainers trained	SNHD: 75 trainers trained  Huntridge: 2 trainers trained	Does not apply: Office of HIV/AIDS UNLV WCHD  No: Part B AETC HOPES UMC  Yes: SNHD: 7 (3+4) HOPES: 1		
	2018-2019	Certify and train location staff to provide rapid testing to high risk populations	At least 10 new rapid testing locations certified	SNHD: Certified 10-15 new locations	Yes: China Springs: 5 CCC: 12 Ridge House: 2 Rural NV: 3 Trac-B: 3 Vitality Elko: 6 HOPES: 2 SNHD: 13 WCHD: 5		
	2018-2021	Increase number of rapid tests conducted in Nevada by certified agencies	Increase number of rapid tests performed the state by 10% above baseline each year.	# of rapid tests AFAN: 131 Hopes: 1894 SNHD: 8936 Huntridge 152 Trac-B: 378 WCHD: 1002  -Total rapid tests 2018: 12,493	# of rapid tests AFAN: 87 (39+48) China Springs: 44 CCC: 340 New Frontier: 161 Ridge House: 95 Rural NV: 50 Trac-B: 285 (107+178) Vitality CC: 127 Vitality Elko: 0 WestCare: 51 HOPES: 884 SNHD: 9,423 (4912+4511) WCHD: 1,336 (721+615) <b>Total rapid tests 2019: 12,883</b>		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2021	Promote rapid testing	# of rapid testing sites	6 organizations offer rapid testing (HOPES, SNHD, WCHD, AFAN, Huntridge, Trac-B) All six organizations are promoting rapid testing with social media campaigns, word of mouth marketing. HOPES, SNHD, and WCHD have printed materials. HOPES, SNHD, and AFAN use provider referrals.	Offer Rapid Testing: COMC AFAN China Springs CCC New Frontier Ridge House Rural NV Trac-B Vitality CC Vitality Elko WestCare HOPES SNHD WCHD Social Media Campaign Provider Referrals Word of Mouth Printed Materials PrEP printed and video materials which discuss testing Printed signs		
	2017-2021	Put rapid testing locations on HIV websites	Website statistics	There is a link to the federal hiv.gov testing locator site on the state HIV prevention/RW Part B website and the RW Part A website. SNHD has an updated calendar with rapid testing dates and sites on its website. The HOPES website provides information about rapid testing it provides. The WCHD website provides testing information. State Office of HIV/AIDS has testing locations on the	Completed	Completed	Completed

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
				website, <a href="https://endhivnevada.org">https://endhivnevada.org</a>			

#### Suggested Actions

- Continue training, recruiting testing sites and promoting HIV testing throughout the state.
- Continue to update web sites.
- AETC is developing a project to work with UMC Quick Care sites in LV to have them implement routine HIV screening, this will start June 1 2020 if funded.

### Objective 1b. By 2021, reduce by 25% the number of new HIV diagnoses.

#### O1b. Strategy 1: Increase education and access to PrEP and PEP

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
✓	2017	Obtain provider and community buy-in for education	# of providers # of partners	AETC's Transgender Health Conference on June 1, 2017 included a session on PrEP and PEP and the HIV summit at the Center in addressed PrEP and PEP. Huntridge Family Clinic has two studies on PrEP and PEP. 					<p>our PrEP Navigators and the providers to increase the knowledge and utilization of PrEP in our community.</p> <p>SNHD is in the process of developing a RAPID ART or RAPID START clinics in the community. The first one will be at the LGBT Center of Southern Nevada, hopefully completed in 2020. This location will also include education on PrEP + PEP education and increase access to PrEP + PEP with having a pharmacy also available.</p> <p>SNHD has also made a website to education providers and community about PrEP - <a href="https://www.southernnevadahealthdistrict.org/programs/office-of-epidemiology-and-disease-surveillance/pre-exposure-prophylaxis/">https://www.southernnevadahealthdistrict.org/programs/office-of-epidemiology-and-disease-surveillance/pre-exposure-prophylaxis/</a> "Nevada is PrEPing for Change" youtube video was to educate providers statewide about PrEP - <a href="https://youtu.be/apB1VwOQpWs">https://youtu.be/apB1VwOQpWs</a></p> <p>WCHD - PEP and PrEP referral services will be expanded to service delivery through WCHD's Sexual Health Clinic</p>		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					which houses the HIV, STD and Family Planning programs. Recruitment and identification of community providers that are willing to offer PrEP within CDC recommendations will occur. Related training and support will also be offered to these providers in to maintain their engagement in PrEP and PEP. Academic detailing will be a critical piece of this effort, as resources are available to provide this intervention. Providers that are prescribing PrEP but are not following guidelines for routine testing and labs are the priority to be approached through the Academic Detailing intervention.		
	2018 - 2019	Enhance and support clinics to offer PrEP	# of clinics providing PrEP  # of clinics supported	AETC: Supported 7 clinics HOPES: supported 1 clinic SNHD: supported 3 clinics UMC: supported 1 clinic Huntridge supported 1 clinic	Providing PrEP: HOPES SNHD COMC UMC  # of Clinics Supported: AETC (6) HOPES (2) SNHD 29 (2+ 27) WCHD (1) UMC (1)	NVHC will be starting a PrEP clinic at MLK site in 2020-pharmacist Samantha Strong.	

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017 - 2021	Develop a resource list of pharmacies where PrEP is available	Resource list	Resource list was updated by: HOPES UMC Huntridge	Updated in 2019: Part B HOPES SNHD		

#### Suggested Actions

- Continue education and awareness activities related to PrEP and PEP.
- Continue to evaluate and share results of the PrEP and PEP efforts.
- Keep resource lists updated.

### O1b Strategy 2: Increase community education of HIV/AIDS through comprehensive sexual health education

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2018	Develop a workgroup for policy development and lobbying policy change for comprehensive, medically accurate sexual health education in schools. Include recommended best practices/curricula in the policy; write in Opt-out policy into bill	Legislative bill outcome	In the 2017, Nevada Legislative Session, AB348 to include comprehensive, medically accurate sexual health education in schools had some traction moving forward in the legislature; however, the bill was vetoed.	Legislation was not passed in the 2019 Legislative Session. A statewide approach does not seem feasible at this point.		
	2019-2021	Collaborate with State Board of Education and local school districts to implement Comprehensive SH education in schools	# of students receiving comprehensive SH education	WCHD is collaborating with State Board of Education.	Yes: SNHD- Attended a NACCHO training on school-based clinics and have not implemented at this time  WCHD- Exploration was in collaboration with WCHD and Community Health Alliance using their mobile unit. Project did not move		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					forward. Sexual health was NOT to be the focus.		
	2019-2020	Explore the development of school-based clinics	Findings of the exploration	WCHD has explored the development of school-based clinics.	The Southern Nevada HIV Prevention Planning Group is working to develop a "Youth HIV Prevention Planning Group." The hope is that these youth/young adults will serve as peer health educators on campus. SNHD: Currently there is no work being done with school-based clinics. Although the SNHD Teen Pregnancy Prevention Program is working with the youth and young adult population along with entities such as Planned Parenthood.		
	2019-2020	Develop a standardized curriculum for HIV/STD 101	Curriculum developed	HOPES and SNHD have a standardized curriculum.	Using Specific curriculum: Dignity Health: The positive Self-management program  HOPES: TPP program (Family talking together; Seventeen Days). Also working		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					on implementation of Title X  WCHD: WCSO approved curriculum  Vitality Carson: Living in Balance		
	2019-2020	Make curriculum available to community partners statewide online	# of trainers trained  # of providers trained  # of people educated	SNHD has made the standardized curriculum available online. 75 trainers have been trained. 15 providers have been trained. 250 people have been educated.	# of people trained: Dignity Health: 8 HOPES: 3 (2+1) WCHD: 115 (100+15)  # of providers: HOPES: 16  # of people: WCHD: 250 (150 + 100) UMC: 5		
	2019-2020	Evaluate curriculum	Evaluation report	SNHD has completed an evaluation report.	No: Part B HOPES SNHD WCHD  Yes: None		

#### Suggested Actions

- Promote standardized curriculums for community education developed by HOPES and WCHD.
- Continue exploration of school-based clinics in the north and expand exploration to the south.
- Continue to explore partnerships with community organizations, after school programs, etc. to help deliver comprehensive medically accurate sexual health education to youth.
- Work with school districts individually around the state to promote their adoption of comprehensive medically accurate sexual health education.
- Continue to explore recruiting youth as peer educators.

**O1b Strategy 3: Provide community-wide harm reduction strategies, including condoms and other harm reduction materials availability and utilization**

		<b>Activity/Intervention</b>	<b>Metric</b>	<b>2018 Status</b>	<b>2019 Status</b>	<b>2020 Status</b>	<b>2021 Status</b>
	2017-2021	Explore condom need in community for priority populations	# and locations distributed	The Center's Pharmacy Project has distributed over 50,000 condoms to HIV positive individuals through pharmacies and other community support groups. SNHD has taken over the program resulting in positive impact. To increase condom distribution, subcontracts in Las Vegas were required to attend a Social Network Recruitment training. In addition to condom distribution, organizations have continued to promote general HIV education strategies.	No updates		
	2017-2021	Identify places where free condoms are most needed	# and locations distributed	UMC, AFAN, Huntridge, Nye County distribute condoms from their main facility. HOPES distributes at the clinic and during community outreach. WCHD distributes at 35 locations; SNHD distributes at 15 locations; Trac-B distributes at over 10 locations. Condoms distributed by agency: HOPES: 5,000	Only distribute at main facility: AFAN CCC COMC Golden Rainbow New Frontier Ridge House UMC  Various locations: HOPES: main clinic, Change point, Our Center, events		

		Activity/Intervention	Metric	2018 Status	2019 Status	2020 Status	2021 Status
				SNHD: 116,200 WCHD: 68,500 UMC: Unknown Huntridge: 12,000 Trac-B: 3,000  <b>Total condom distribution 2018: 204,700+</b>	SNHD: SHC, Trac-B, AFAN, LGBTQ Center, Huntridge Clinic, CCC  Trac-B: several outreach locations monthly  WCHD: 40 sites; clinics, health fairs,  Number of condoms distributed: AFAN: 1,000+ SNHD: 102,000 (92,000+10,000) Trac-B: 13,000 (3,000+10,000) WCHD: 90,000 (52,550+38000) COMC 1000 CCC:1000+ Golden Rainbow: 250 Ridge House: 40 HOPES: 40,000+ UMC: 500  <b>Total condom distribution 2019: 248,790+</b>		
	2017-2018	Identify where people can buy condoms	Resource guide posted on website	AETC and HOPES reported there is a resource guide to identify where people can buy condoms.	No updates		
	2017-2019	Explore different pathways to acquiring condoms (i.e. working with manufacturers to get cheaper condoms for people to buy)	Pathways noted	Preventions: Purchase condoms from distributors and obtaining public health rating. We also share	SNHD- Discussion with pharmacists and other SoN HPPG members about using Medicaid to		

		Activity/Intervention	Metric	2018 Status	2019 Status	2020 Status	2021 Status
				this resource with community partners. HOPES: Have applied for free condoms through manufactures. Currently receive Teen Pregnancy Funds, which allows us to purchase these in bulk. WCHD: Developing mail order condom distribution program.	obtain condoms, discussions with Trojan about sales and marketing information locally at the National Sexual Health Conference  WCHD- Implementing a web-based, mail order program		
	2017-2021	Awareness campaign about ability to get condoms through Medicaid	Distribution information regarding reach of campaign	HOPES and Huntridge provide information about getting condoms through Medicaid.	Provided information: HOPES China Springs Vitality Carson WestCare UMC		
	2017-2018	Increase accessibility by creating an online application to map free and purchased condom locations in Nevada	App created  # of app users	HOPES uses a mobile app to increase awareness/accessibility of locations to purchase condoms	Using an app: None		
	2017-2018	Provide capacity building assistance for the implementation of syringe services programs (SSP)	# of CBOs trained; SSP launched in Southern Nevada	SNHD: 2 CBOs trained Huntridge: 2 CBOs trained	Yes: HOPES: 1 SNHD: 4		
	2018-2019	Pilot of syringe exchange machines in Southern Nevada	# of machines placed  # of syringes exchanged	Funded for pilot of syringe exchange machines:  Prevention: unknown number of machines SNHD: 4 machines  HOPES: 1,200,109 were collected; 1,800,754 provided out	Machines Placed: Office of HIV/AIDS- 3-2 more adding soon in rural area  SNHD- 2 Trac-B Center for Behavioral Health and TIM Cares  Number of Exchanges: HOPES:

					462,555 +429,173 = 891,728 in; 372,887+ 411,015= 783,902 out SNHD/Trac-B 310,185 + 370237= 680,422 in 201,737 + 268,663= 470,400 out		
	2018-2019	Develop buy-in from community organizations and businesses that would be impacted by the SSP	# of community organizations and businesses reached	Number of businesses/CBOs reached: <ul style="list-style-type: none"> <li>• Prevention: Unknown</li> <li>• HOPES: approximately 8</li> <li>• SNHD: 10</li> </ul>	Names of businesses/CBO reached: <p>HOPES: (13) City of Reno; The Row (Casinos); Reno Police Department; Sparks Police Department; University of Nevada, Reno; Our Center; SAPTA Sites (Family Counseling Services, Bristlecone, Step One, Step Two, Quest Counseling, Empowerment Center, Center for Behavioral Health, Ridge House). City of Reno, Eddy House.</p> <p>SNHD: Center for Behavioral Health and TIM Cares has a SVM, but rural counties in NV have been approached about hosting a syringe vending</p>		

		Activity/Intervention	Metric	2018 Status	2019 Status	2020 Status	2021 Status
					machine in their jurisdiction. Mineral Country and Ely City		
	2020-2021	Expand syringe services to centers for harm reduction, syringe exchange, wound care	# of centers established # of IDU served	Established Centers HOPES: 1 (1,200,109 were collected; 1,800,754 provided out) SNHD: 3 (573 clients served) Dignity Health: 1 (Does not apply) Huntridge: 1 (Does not apply) Trac-B: 4 (11,175 clients served)	Expanded SSP: SNHD/Trac-B: added two sites- Center for Behavioral Health and TIM Cares  # of clients served: SNHD:7,543 (6543+1000) Trac-B: 7,417 (1000+ 6417)		
	2021	Analyze data from SSP to evaluate best practices moving forward	Evaluation report	HOPES has analyzed data on SSP. SNHD and Trac-B are in progress of data analysis but had not completed a report.	Analysis in progress: HOPES SNHD Trac-B  Completed evaluation: none		

#### Suggested Actions

- Identify additional CBOs that might be able to take provide capacity building for SSPs and develop an action plan. Determine what would that look like and who will provide capacity building (such as agencies that have experience with SSPs—SNHD and Northern Nevada HOPES).
- Increase awareness of resource guides and apps that identify locations for free and purchased condoms across the state
- Continue developing buy-in from community organizations to support SSP

## Goal 2: Increasing Access to Care and Improving Health Outcomes for PLWH

Objective 2a. By 2021, increase to 85% the percentage of people newly diagnosed with HIV who have been linked to a provider within the first 30 days.

2015 baseline<sup>1</sup>: 81% (calculated including those linked to provider within 90 days of diagnosis)

2018 update: 89.3% (within first 90 days of diagnosis)

**2021 target: 85% (within first 30 days)**

Baseline data needs to be recalculated to fit the objective, which specifies linking within the first 30 days.

Source: Division of Public and Behavioral Health, HIV/AIDS Reporting System (eHARS), data as of March 2019.

\*Persons Living with HIV indicate any person regardless of HIV staging, including HIV stage 3 (AIDS).

<sup>a</sup>Defined as persons diagnosed with HIV infection (regardless of stage of disease) through year-end 2017, who were alive at year-end 2018.

<sup>b</sup>Calculated as the number of persons linked to care within 3 months after HIV diagnosis during 2018, divided by the total number of persons diagnosed with HIV infection in 2018. Linkage to care is based on the number of persons diagnosed during 2018, and is therefore shown in a different color than the other bars with a different denominator.

<sup>1</sup> Office of HIV/AIDS, Nevada Division of Public and Behavioral Health. Nevada Integrated HIV Prevention and Care Plan 2017-2021, Carson City, Nevada. September 2016.

*c*Calculated as the percentage of persons who had  $\geq 2$  CD4 or viral load test results at least 3 months apart during 2018 among those diagnosed with HIV through year-end 2017 and alive at year-end 2018.

*d*Calculated as the percentage of persons who had suppressed VL ( $\leq 200$  copies/mL) at most recent test during 2018, among those diagnosed with HIV through year-end 2017 and alive at year-end 2018.

*f*Calculated as number of persons who had suppressed VL ( $\leq 200$  copies/mL) at most recent test during 2018, among those who were retained in care during 2018.

## O2a. Strategy 1: Improved communication between organizations

		Activity/Intervention	Metric	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2021	Develop regional flow chart (resource map) of services/activities for the newly-diagnosed and for providers and update it regularly.	Staff time  Web application  Materials for distribution	A regional flow chart, that includes services and actives for HIV+ patients, is available online and in print.	Completed	Completed	Completed
	2017-2021	Utilize CAREWare referral system to coordinate new patient intakes between organizations. Utilize to schedule out different organizational staff at other clinics/facilities, such as case managers where there are none	# of referrals being scheduled via this system. Is it manageable? Does it work?  # of referrals lost to follow-up	Part A: By agency HOPES: Scheduled to us or send out? 				SNHD (12 trainings) UNLV (10 trainings) AFAN (12 trainings) COMC (2 trainings) Nye County (12 trainings)			
	2017-2021	Annual Ryan White provider conference with training, RW updates on initiatives, basic fiscal and quality management, advanced training/certifications, strategies	# of attendees  Conference evaluation report	Part A: 8 attendees Part B: 20 attendees HOPES: 13 attendees SNHD: 20 attendees UMC: 4 attendees UNLV: 2 attendees AFAN: 14 attendees COMC: 5 attendees NV Legal: 1 attendee Nye County: 1 attendee Trac-B: 2 attendees	# of attendees: ACCEPT: 6) AHN: (34+5) AFAN: (15+5) CCC: 5 COMC: 9 Golden Rainbow: 3 Dignity Health: 2 HELP of SN: 6 NV Legal Services: 1 HOPES: 15 (12 +3) NYE County HHS: 4 (2+2) SNHD: 25 (10+15) Trac-B: 3 UNLV: 1 WCHD: 3 UMC 8		

#### Suggested Actions

- Continue to develop and routinely update resource guide of services and mapping of systems that will enhance the use and efficiency of the CAREWare system to coordinate new patient intakes and referrals among organizations.
- Continue to plan and develop a biennial Ryan White provider conference to include RW initiatives: fiscal and quality management and prevention.
- Identify pathway to reduce number of clients lost during follow-up with CAREWare.

#### O2a Strategy 2: Link hard-to reach populations to providers to provide continuity of care for PLWH

		Activity/Intervention	Metric	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2019	Linking justice-involved individuals with local clinics to provide continuity of care for those patients. Identify a point organization for parolee case management in	# HIV+ parolees  # making connections with point organizations  # of first visits	Organizations who link (# of first visits)  Part A (SNHD) HOPES (would be for new patients (i.e., new	# of first visits AHN: unable to report Dignity Health: 1 HOPES: 2 SNHD: 15-30? WCHD: 4		

		Activity/Intervention	Metric	2018 Status	2019 Status	2020 Status	2021 Status
		each North and South. Jails and prisons would connect HIV+ patients to the case management team initially, who would manage their care, set them up for services, referrals, eligibility		dx or relocates in 2018?) SNHD (unknown/24) WCHD (unknown) UMC (15) AFAN (don't have access to information) Dignity (10)			
	2017-2019	Link HIV+ mental health & substance abuse clients with local clinics to provide continuity of care. Identify point organizations and providers.	# of MH & SA clients linked  # of first visits	Organizations who link (# of first visits)  Part A (by agency) HOPES (need to pull report) SNHD (unknown) WCHD (not tracked separately at this time) UMC (80) AFAN (don't have access to information) COMC (4) Dignity (30) HELP of SN (38) NV Legal (send people to eligibility and enrollment and housing assistance but I don't know how many actually went for their first visit) Nye County (3) Trac-B (1)	# of first visits: ACCEPT: 3 AHN: unable to report AFAN: 37 COMC:5+ Dignity Health: 20 HELP of SN: 0 HOPES: 10 SNHD: unknown Trac-B: 10+ Ridge House: 1 WestCare: 2 UMC: unknown WCHD: unknown		
	2018-2021	Link HIV+ homeless clients with local clinics to provide continuity of care. Identify point organizations and providers.	# of homeless clients linked  # of first visits	Organizations who link (# of first visits)  Part A (by agency) HOPES (These are new clients to us) SNHD (unknown) WCHD (unknown)	# of first visits: AHN: unable to report AFAN: 89 COMC: 5+ Dignity Health: 2 HELP SN: 6 HOPES: 3		

		Activity/Intervention	Metric	2018 Status	2019 Status	2020 Status	2021 Status
				AFAN (unknown) Dignity (30) HELP SN (unknown) NV Legal (send people to eligibility and enrollment and housing assistance but I don't know how many actually went for their first visit)	SNHD: will follow up Trac-B: unknown WestCare:3 WCHD: 2		
	2019-2021	Link HIV+ individuals from refugee populations with local clinics to provide continuity of care. Identify point organizations and providers	# of refugee clients linked  # of first visits	Part A (by agency) HOPES (pulling report) SNHD (unknown) WCHD (none identified but service is available) AFAN (do not have access to information) NV Legal (send people to eligibility and enrollment and housing assistance but I don't know how many actually went for their first visit)	# of first visits: AHN: unable to report AFAN: unable to report SNHD: will follow up HOPES: unknown		

#### Suggested Actions

- Continue to work with jails and revise activity to reflect this work, while strengthening partnership with Nevada Department of Corrections (NDOC) and support efforts to link parolees and re-entry populations to services.
- Continue to work on linking HIV+ mental health and substance abuse clients to care and enhance connections with SAPTA, point organizations and providers.
- Work on expanding linkages to care with homeless and refugee populations including finding partner organizations that are experienced in working with those populations.
- Develop better ways to track linkage to care for these hard-to-reach populations.

### O2a Strategy 3: Facilitate patient readiness to participate in their care and management of HIV

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2019-2020	Create a set of guidelines defining peer advocates.	Guidelines				
	2017-2018	Expand Peer-to-peer advocate to Part A and Part B sites as applicable	# of sites with peer advocates	Have peer advocate program: Part A (by CCC) SNHD- 40 PLWH were assisted by peer navigator	# of PLWH assisted by peers: SNHD: all CCC: all Horizon Ridge: unknown		
	2019-2020	Evaluate peer advocate program	Evaluation report	SNHD has completed an evaluation report on peer navigation program.	Community Counseling Center completed an evaluation		
	2018-2019	Develop peer (HIV+) volunteer support system to meet individually with newly diagnosed, based at case management organizations.	# of clients participating	Offers peer (HIV+) volunteer support program:  Part A (by agency) Dignity Health (3 clients in 2018)	# of clients participated: Dignity Health: 6 CCC: 25 UMC: 4		
	2017-2021	Delivery of 6-week Positive management program to HIV+ clients and chronic disease management	# of clients participating	Offer 6-week program: Part A (by dignity health) SNHD (6 clients) Dignity Health (30 clients)	# of clients participating: Dignity Health: 49 Nye HHS: 11		
	2018-2019	Explore the requirements to have peer advocates become CHW through the certification program	# of peer advocates certified	Have explored requirements for peer advocates to become a CHW, but have not certified any CHWs <ul style="list-style-type: none"> <li>• Part A</li> <li>• HOPES</li> <li>• SNHD</li> </ul>	Have explored, but have not certified any CHWs: HOPES SNHD		

#### Suggested Actions

- Identify who will develop guidelines for peer advocates so there is a common definition in use and publish the guidelines.

- Continue to expand peer-to-peer advocacy at Part A and Part B sites and grow the number of agencies with site-based peer advocates.
- Explore continuous or additional funding, possible internship or volunteer projects to support CHWs at more sites and community organizations.

## Objective 2b. By 2021, increase by 20% the percentage of clients in care needing mental and/or behavioral health services who went to their first appointment.

Measurement feasibility needs to be determined for this objective.

### O2b. Strategy 1: Improve communication among organizations and between clients and organizations

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2021	(See 2a) Develop regional flow chart (resource map) of services/activities for all HIV+ patients, including mental/behavioral/substance use resources and update it regularly.	Completion of flow chart (resource map)  Maintenance/updates  # of hits to website  # of flyers handed to clients at testing sites	Office of HIV/AIDS and RW Part A both have resource directories available on their websites.	Completed	Completed	Completed
		Update resource guide regularly	# of website hits of resource guide  # of updates		Yes: Part B: 500 Website hits		
	2017-2018	Part A and B having the same internal referral process to easily track referrals made and completed	Documentation of referral process	Need to discuss	Need to discuss		
	2018-2019	Needs assessment; consumer forum to find out what is needed from a client perspective to get them to appointments	Needs assessment report	Las Vegas TGA completed a targeted needs assessment focused on PLWH who accessed Ryan White Part A Mental Health and Substance Use services. Results from the targeted needs assessment helped inform the Planning	No updates		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
				Council's FY 2017 Priority Setting and Resource Allocation process. Part A completed a comprehensive needs assessment in 2018.			
	2018-2020	Increase communication regarding point of entry, eligibility, and services provided and requirements between managed care health plans and Ryan White and other health plans.	Communication plan		Internal workgroup determined this activity no longer applies as it was related to ACA and has worked itself out.	Completed	Completed
	2019-2021	Conduct evaluation of communication including perspectives from impacted stakeholders	Evaluation plan Evaluation report		No updates		

#### Suggested Actions

- Continue to update resource map and guide of services while also continuing to maintain open and transparent communication between Part A and B to sustain an efficient tracking process for referrals between agencies and organizations.
- Possibly identify additional activities that may help support this strategy.

#### O2b. Strategy 2: Recruit more mental/behavioral health providers

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2019	Collaborate with mental/behavioral health providers	# of providers # of appts referred # of visits	HOPES and HELP of SN added mental health provide(s) in 2018. 	2017-2018	(See 2a) Develop regional flow chart (resource map) of services/activities for all HIV+ patients, including mental/behavioral/substance use resources and update it regularly.	# of flow charts distributed or accessed through the website	Office of HIV/AIDS has a website with the state resource directory Part A also has a directory on its website.	Completed	Completed	Completed

**Suggested Actions**

- RW funded agencies continue to participate in professional development opportunities both in-state and out-of-state as funding permits.
- Continue to explore and implement strategies to educate MH and SA providers about HIV integration.
- All professional development opportunities should continue to maintain an educational focus on the integration of MH and SA with HIV.

**Objective 2c. By 2021, 80% of people diagnosed with HIV, who have had a medical visit each year for the past two years, will be virally suppressed (VL <200).**

2015 baseline<sup>2</sup>: 75% (calculated of those who were retained in care within past one year)

2018 86% Target Exceeded (calculated of those who were retained in care within past one year)

**2021 target: 80% (retained in care with a medical visit each year for past two years)**

<sup>2</sup> Office of HIV/AIDS, Nevada Division of Public and Behavioral Health. Nevada Integrated HIV Prevention and Care Plan 2017-2021, Carson City, Nevada. September 2016.

Percentage of PLWH retained in care who are virally suppressed, 2015-2018

O2c. Strategy 1 Address treatment adherence of PLWH through educational strategies and evaluation.

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status

					WCHD: NA		

#### **Suggested Actions**

- Continue to ensure that patient education programs are language and literacy appropriate as they are developed and delivered.
- Maintain evaluations around the continuum of care regularly in order to identify patterns of viral load suppression, status, and various services accessed.
- Consider refocusing to add a strategy on retention in care since this objective has been met but only 52% of PLWH were retained in care in 2018.

#### **O2c. Strategy 2 Provide education and information regarding uninterrupted access to and proper use of medication**

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2018	Ensure clinical programs include medication management materials, support, educational programs and counseling for all patients	# of programs providing medication adherence materials and education to clients	Medication Management Materials: <ul style="list-style-type: none"> <li>• Part A</li> <li>• HOPES</li> <li>• SNHD</li> <li>• UMC</li> <li>• AFAN</li> <li>• COMC</li> <li>• Dignity Health</li> <li>• Nye</li> </ul> Support: <ul style="list-style-type: none"> <li>• Part A</li> <li>• HOPES</li> <li>• SNHD</li> <li>• AFAN</li> <li>• COMC</li> <li>• Dignity Health</li> <li>• HELP of SN</li> <li>• NV Legal</li> <li>• Trac-B</li> </ul> Educational Programs: <ul style="list-style-type: none"> <li>• Part A</li> <li>• HOPES</li> <li>• Dignity Health</li> </ul> Counseling: <ul style="list-style-type: none"> <li>• Part A</li> <li>• HOPES</li> <li>• UMC</li> <li>• AFAN</li> <li>• Dignity</li> </ul>	AHN: case management  AFAN: Medication management, support, education program, counseling  Dignity Health: Medication management, support, education program, counseling  HOPES: Medication management, support, counseling, education program  Nye County HHS: support  WCHD: support, counseling  China Springs: support, education program, counseling		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					<p>COMC: Medication management, support, education program, counseling</p> <p>WestCare: support, counseling, nutrition education</p> <p>Part A: Medication, support, educational program, counseling</p> <p>UMC: Medication, support, individual counseling</p>		
	2017-2021	Provide education to pharmacists on HIV medication adherence	# of pharmacists receiving education	# of Pharmacists who receive education in 2018 Part A: unknown HOPES: 2 FTE pharm, 6 part time pharmacists SNHD: 1	<p>Pharmacists have not received education: Dignity Health WCHD</p> <p># of pharmacists who have received education: HOPES: all are AAHIVM certified/2 SNHD: 1</p>		
	2017-2021	Encourage pharmacists that work with HIV clinics to get certified in HIV care (AAHIVM certification)	# of pharmacists with HIV specialty	# of pharmacists with specialty Part A: SNHD HOPES: 8 SNHD: 1	Pharmacists are not certified: Dignity Health WCHD		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					# of pharmacists who have certification: HOPES: all/2		
	2017-2021	Disseminate information about policies to clients regarding emergency medication access	# of clients receiving materials	Disseminate information about policies: Part A HOPES SNHD AFAN Dignity Health	# of clients who received: ACCEPT: 27 AFAN: 24 HOPES: 26 CCC: all qualified clients COMC: 60+ Ridge House: 95 HOPES: 75		

#### ***Suggested Actions***

- Continue to work with pharmacists and encourage AAHIVM certification.
- Develop tailored education to work with pharmacists on HIV medication adherence who do not predominantly work in HIV.
- Analyze data to find pharmacies with incomplete fills to identify on which pharmacists to focus education efforts.
- Consider having an AAHIVM certified pharmacist train pharmacists who do not regularly work with HIV.
- Maintain updated emergency policy and disseminate it to clients on an annual basis.

### **O2c. Strategy 3 Educate both client and provider stakeholders regarding the importance of routine viral load testing and tracking of viral load data**

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status

					Golden Rainbow: 20 Help SN: 37 Ridge House: 95 WestCare: 3 UMC: 2,192		
	2017-2021	Create data sharing agreements between CAREWare and labs	# of agreements	# of agreements Part A: 1 Part B: 1 SNHD: 1 UMC: 2	Number of Agreements: Part B: 1 SNHD: 1		
	2017-2021	Educate clinicians to do at least 2 viral load tests per year	# of clinicians educated	# of clinicians educated: Part A: 4 agencies HOPES: 4 specialists SNHD: 5 UMC: 5 UNLV: 2 COMC: 3  Do not receive this education: Dignity Health	# of clinicians educated HOPES: 4 SNHD: 3 COMC: 5 HOPES: 5 UMC: 5 Part A: 16 agencies		
	2017-2021	Educate the community about community viral load data	# of materials, campaigns, events	Part A: Planning Council training on U=U. Consumer forum and roles and responsibilities training for Planning Council.  HOPES: During UNR class tours or informal presentations  WCHD: Education on U=U using federal resources, Prevention Access resources and the US/Nevada care continuum	HOPES: We have a CQI Board and Committee that meets monthly to review clinic metrics on viral load data. Continuous quality  Nye County HHS: I always let my clients know how important it is to be undetectable.  SNHD: Included in the Link to Care		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
				COMC: handouts brochures educational materials  Dignity Health: One of the lessons in the Positive Self-Management Program is about viral load suppression and we use a chart.	educational materials  WCHD: use national and state continuum of care data in educational presentations  Part A: consumer dev. committee  UMC: doctors routinely educate in the community		

#### Suggested Actions

- Continue to meet the standards of care for RW Part A and B and conduct at least one viral load test per year.
- Continue working on streamlining CAREWare and lab data so that agreements can be shared while still meeting standards of care.
- Consult with OPHIE on how to measure community viral load.
- Continue to expand community education on community viral load.

## Objective 2d. By 2021, reduce to 20% the incidence of STIs in HIV infected persons in care.

### O2d. Strategy 1 Conduct provider education and disseminate recommendations regarding routine screenings for STIs

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017	Recommend that HIV care clinics have plans in place for routine sexual history and screening for STIs	# clinics implementing	Routinely screen for sexual history and STI: Part A HOPES SNHD WCHD UMC AFAN COMC Trac-B	Routinely screen for sexual history and STI: HOPES SNHD WCHD China Spring AFAN CCC COMC Ridge House Vitality Carson WestCare UMC		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status

#### Suggested Actions

- Continue to disseminate findings on a regular basis
- Expand quality management teams

### Goal 3: Reducing HIV Related Disparities and Health Inequities

Objective 3a. By 2021, reduce disparities in the rate of new diagnoses by at least 15 percent among Nevada's priority populations.

Will work with OPHIE to calculate baseline disparity ratios for MSM, youth/young adult, black males, black females, and Hispanic males according to the National HIV/AIDS Strategy Indicator guidelines<sup>3</sup>.

<sup>3</sup> Office of National AIDS Policy. (2016). *National HIV/AIDS strategy for the United States: Updated to 2020: Indicator Supplement*. Available: <https://files.hiv.gov/s3fs-public/nhas-indicators-supplement-dec-2016.pdf>

Annual Rate of New Diagnoses Among Males by Ethnicity, 2015-2018

Annual Rate of New Diagnoses Among Females by Ethnicity, 2015-2018

### O3a. Strategy 1: Engage the community in order to find out how to best reach priority populations

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017	Conduct listening sessions with individuals from groups experiencing disparities to identify any gaps in knowledge or incorrect beliefs about HIV.	Number of individuals “heard”  Number of persons from each target group that participated		SNHD has conducted listening sessions with 15 individuals at two sites (Community Counseling Center and Trac-B Harm Reduction center) representing different viewpoints (Youth n=2; HIV+ n=1; MSM n=9; Spanish speaker n=2; WSW n=; Male HS n=1; Female HS n=1)		
	2017	Identify successful group-specific disease prevention strategies that can be adapted to HIV prevention.	Identification of proven strategies				

### O3a. Strategy 2: Implement HIV prevention public education through media campaigns and social network strategies to target populations.

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2018-2021	Using information from listening sessions and components from other successful programs, identify the best locations, events, social media and other media strategies, etc. to reach target groups	# locations and platforms identified for each target group in each community		AETC working with UNLV to develop messaging strategies to reach most affected populations. Starting in LV, work continues.		
	2019-2021	Using information from listening sessions and components from other successful programs,	# of educational efforts completed for each target		AETC working with UNLV to develop messaging strategies to reach most		

		<b>Activity/Intervention</b>	<b>Metrics</b>	<b>2018 Status</b>	<b>2019 Status</b>	<b>2020 Status</b>	<b>2021 Status</b>
		develop and implement group specific HIV 101 media and social media campaigns that 1) provide education about how to prevent HIV; 2) motivate people to get tested; and 3) empower HIV+ people to get into care	group in each community		affected populations.		
	2019-2021	Evaluate social network strategies	Evaluation report				
	2020-2021	Evaluate effectiveness and reach of education provided: Compare baseline data (prior to 2017) on new infections per 100,000 population to levels in each target group	# of new infections per 100,000 population, target groups vs white  % change in number of new infections in target groups from year to year				
	2019-2021	Conduct listening sessions with individuals from target groups experiencing disparities to find out if they are familiar with any of the educational efforts, and to find out what they know/believe about HIV.	Number of individuals "heard" Number of persons from each target group that participate		Southern Nevada: HPG Public Health Co-Chair collaborated with community partners to recruit participants to conduct listening sessions with priority populations (PLWHA, MSM, Youth and Young Adults, and PWUS). Approximately 20 listen sessions have been conducted and information compiled. Analysis of this information	More listening sessions will be conducted through UNLV for their work on the EHE project re messaging.	

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
					has not been completed.		
	2020-2021	Using information from listening sessions, identify the methods, messages, locations, radio or TV stations, bus routes, events, etc. that were most likely to reach target groups Using information from listening sessions, identify any new methods, messages, locations, radio or TV stations, bus routes, events, etc. that will be likely to reach target groups Discontinue unsuccessful methods, continue successful one, and implement new methods, messages, locations.	# of locations and platforms identified for each target group in each community  Change from baseline in percent of PLWH linked to care		Southern Nevada: Approximately 20 listen sessions have been conducted and information compiled. Analysis of this information has not been completed.	More listening sessions will be conducted through UNLV for their work on the EHE project re messaging.	

#### **Suggested Actions**

- Analyze and disseminate findings from the listening sessions.
- Use listening session results to Identify successful group-specific disease prevention campaigns and strategies that can be adapted to HIV prevention.
- Include recent immigrants and refugees in information-gathering efforts to gauge linguistic needs and culturally appropriate services.
- Ensure that efforts are trans-inclusive. Gather data and determine target number for transgender.
- Explore educating providers on transgender, LGBTQ, refugees, and immigrants.
- Gather additional data on what languages are most needed for program materials.

#### **O3a. Strategy 3: Increase provider and organization capacity to test at sites in their communities**

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2019	Training CBOs and communities with high risk to provide on-site testing	# of providers/CBO staff trained	# of providers/staff trained HOPES: 3 SNHD: 30 AFAN: 5 Huntridge: 2 Trac-B: 5	No updates		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017-2020	Identify and recruit additional providers and CBOs to have testing at their sites	# of providers and CBOs recruited  # of test	<b>Number of Providers:</b> Prevention: 0  <b>Number of CBOs:</b> Prevention: 1  <b>Did not recruit:</b> HOPES SNHD WCHD UMC	No, we did not identify any providers: AETC HOPES SNHD Part B UMC WCHD  # of CBOs Office of HIV/AIDS: 25		
	2020-2021	Evaluate CBO on-site testing programs	Evaluation Report	<b>Did an evaluation:</b> SNHD	No updates		

#### **Suggested Actions**

- Develop recruitment plan to increase number of CBOs with testing on their sites
- Expand number of providers trained

### **Objective 3b. By 2021, increase to 85% the percentage of newly diagnosed with HIV among Nevada's priority populations who have been linked to a provider within the first 30 days.**

Will work with OPHIE to obtain baseline data for the priority populations to fit the objective, which specifies linking within the first 30 days.

#### **O3b. Strategy 1: Improve first contact and point of access to care for PLWH who experience multiple "layers" of stigma (e.g., HIV infected, gay, minority, female, transgender, IV drug user, etc.)**

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017	Conduct listening sessions with individuals from PLWH in underserved populations and high risk groups to 1) learn about their first contact experiences with HIV agencies; 2) find out if negative experiences in first or early contact prevented them from continuing or	Total number of individuals "heard"  # of persons from each underserved or high risk group that participate	Need update	In Southern Nevada, approximately 20 listen sessions have been conducted and information compiled. Analysis of this information has not been completed.		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
		pursuing HIV care and/or accessing services; and 3) get ideas and suggestions for ways to make improvements					
	2018	Review information gathered in listening sessions Develop new strategies for improving first contacts.	# of HIV care and service organization and employees and volunteers who receive information on how to improve first contact experience		AETC working with UNLV to develop messaging strategies to reach most affected populations. Starting in LV, work continues.		
	2017-2021	Provide experiential training to employees and volunteers in HIV care and service organizations about how personal bias and stigma can prevent PLWH in underserved populations and high-risk groups from accessing and staying in care Conduct brainstorming sessions on how to improve first access and point of contact Recognize persons and agencies that PLWH deem most welcoming Follow up with trainees at 3- and 9-months post training to determine what changes or improvements were made and sustained	# of employees and volunteers trained  # of trainees who report making and sustaining improvement	# of employees/volunteers trained on bias/stigma Part A: 5 Prevention: ??? HOPES: 35+ SNHD: 153 WCHD: 20 UMC: 7 UNLV: 600+ Huntridge: 16	No: Part B HOPES  Yes (number trained) AETC: 134 SNHD: 181 (74+ 107) UNLV: 364 WCHD 347 (25+ 322) UMC: 100+		
	2020-2021	Repeat listening sessions with individuals from PLWH in underserved populations and high risk groups to see if there have been improvements in their first contact experiences	Total number of individuals "heard"  # of persons from each underserved	Pending first round of listening sessions	Pending first round of listening sessions		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
		with HIV agencies and get additional ideas and suggestions for ways to make improvements	or high-risk group that participate  Change from baseline in percent of PLWH who are retained in care and who are virally suppressed				

#### **Suggested Actions**

- Review information gathered in listening sessions and use to develop new strategies for improving first contacts.
- Identify and understand knowledge gaps, language barriers, cultural practices, inaccurate beliefs, etc. that are contributing to the disparately high rates of HIV infection in certain groups as a first step in reducing disparities.
- Develop new strategies for improving first contacts.
- Clarify which groups are experiencing disparities in rates of new infections and low levels of linkages to care and specify which groups are included in “Nevada’s priority populations” in order to measure progress on this goal. Additional data may need to be collected for new priority groups (such as homeless, transgender, recent immigrants, rural, etc.) to establish baselines and track changes over time.
- Continue to provide experiential training to employees and volunteers.

#### **O3b. Strategy 2: Improve the ability of PLWH in underserved or high risk groups to navigate the HIV system of care.**

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2017	Develop HIV community-specific websites that are updated monthly to list available services, who is eligible to access the services, cost for services, who to call, how to access, locations, hours, etc.	Accuracy and timeliness of information  # of “hits” on the website				
	2018	Hold a yearly provider showcase for all parts, where all services provided will be discussed and case studies will be reviewed in an effort to enhance service delivery between agencies to PLWH.	# of providers participating	# of providers participating Office of HIV: 1 Part B: 16 HOPES: each SPEC meeting we sent 1-5 staff UMC: 8 UNLV: 1 Huntridge: 1	X of providers participated: HOPES: 31 (25+6) SNHD: 22 (7+15) Part A: 16 Part B: 29 (19+10) UMC: 1		

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2018	Implement “peer navigator” program. Role of peer navigators is to mentor newly diagnosed people, “hold their hand” early in the process of accessing services (help them fill out forms, go to agencies, get labs done, etc.), know when to reapply, and help them become self-sufficient over time	# of PLWH assisted by peer navigators	# of PLWH assisted by peer advocate Part A: By CCC SNHD: 40	Does not have peer navigation ACCEPT AHN AFAN Dignity Health Nevada Legal Services Nye County HHS Trac-B UNLV WCHD  3 of PLWH assisted by peers: SNHD: see RW providers		

#### **Suggested Actions**

- Test the new website with people from a variety of communities to see how easy it is for them to navigate.
- Explore feasibility and desirability of customized websites for different communities.
- Expand support for providers to attend yearly showcase.

### **O3b. Strategy 3: Improve the accessibility of information for PLWH in underserved or high-risk groups.**

		Activity/Intervention	Metrics	2018 Status	2019 Status	2020 Status	2021 Status
	2018	Review all current patient materials (enrollment, list of services, patient responsibilities, timelines, payment, etc.) for health literacy criteria  Revise materials as needed to be at 6 <sup>th</sup> grade reading level	% of written materials meeting health literacy standards  # of staff trained in health literacy  # of staff reporting making changes in how they communicate with clients	Need translation services: Part A HOPES SNHD WCHD UMC UNLV AFAN COMC Dignity HELP NV Legal	Have translation services: ACCEPT AFAN China Springs COMC Golden Rainbow Dignity Health NV Legal Services HOPES SNHD UNLV WCHD WestCare

	2017	Determine the need for translation in other languages besides Spanish	% of clients who speak other languages report easy access to translators		No updates		
	2019	Implement welcoming drop-in programs in different communities at different “user friendly locations” and different times and days	# of drop in programs conducted  # of persons coming to the drop-in programs  # of PLWH who report accessing services as a result of attending drop-in program		AFAN conducted living room session -Conducted 2 sessions -Does not have # of PLHW coming to program -# of PLHW who accessed... not reported		

#### Suggested Actions

- Conduct an evaluation to identify where these Spanish-Speaking staff are accessed (on the phone or front office at first contact, in social services or medical care, etc.), and to assess if current bi-lingual staffing is adequate to meet the need.
- Literacy levels of materials should be assessed as well as having materials available in Spanish.
- Expand welcoming drop-in programs
- Improve tracking of #s of PLWH accessing programs

## Conclusion

The review of Integrated Plan activity progress through December 2019 revealed progress with respect to many activities. With the help of CDC funding, Nevada’s End the Epidemic planning group has been able to facilitate some of the work needed with respect to data collection from providers, the community and PLWH to inform Nevada’s EHE planning efforts, as well as plans for social marketing efforts, particularly in Las Vegas in the coming years. The 2018 Continuum of Care demonstrated improvement in the percentage of PLWH retained in care, as well as the percentage of those retained in care with suppressed viral loads. However, the percentage of PLWH retained in care is only 52%. Reviewing strategies and activities to focus on retention in care may be warranted. The Integrated Plan

Monitoring Workgroup will review Nevada's 2019 data when available to help assess progress towards the plan goals and objectives. The online data reporting tool has continued to improve the amount and quality of data we are able to collect, particularly from the subrecipients. The Integrated Plan Monitoring Workgroup will continue to meet to review the Plan objectives, strategies and activities to determine if any changes should be made to fit current priorities and resources available in the state and will continue to work closely with Nevada's End the Epidemic campaign planning group to coordinate the plans.

## Appendix A: List of Acronyms

AAHIVM	American Academy of HIV Medicine
ACA	Affordable Care Act
ACCEPT	Access for Community & Cultural Education Programs & Training
ADAP	AIDS Drug Assistance Program
AETC	AIDS Education and Training Center
AHF	AIDS Healthcare Foundation
AFAN	Aid for AIDS of Nevada
AIDS	Acquired Immunodeficiency Syndrome, also referred to as HIV stage 3 (AIDS).
AI/AN	American Indian/Alaskan Native
API	Asian/Hawaiian/Pacific Islander
ART	Antiretroviral Therapy
ARTAS	Anti-Retroviral Treatment and Access to Services program
CBO	Community Based Organization
CCC	Community Counseling Center
CCHHS	Carson City Health and Human Services
CDC	Centers for Disease Control and Prevention
COMC	Community Outreach Medical Center
CPG	Community Planning Group
CRCS	Comprehensive Risk Counseling Services
DIS	Disease Investigation Specialist
DPBH	Division of Public and Behavioral Health
