

Non statutory recommendations

The following details the non-statutory recommendations of the Task Force of HIV Modernization:

The Task Force on HIV Modernization developed two recommendations pertaining to completion of the work.

- An extension of the deadline required by SB 284, in order to complete the work required to meet the mandates of the bill. The Task Force did not begin their work until July 8, 2020, due to challenges including the appointment of Task Force members and the COVID-19 pandemic.

- Recommendation: Completion of appointments to the HIV Modernization Task Force. Currently nine of the 15 possible appointments are serving on the Task Force. The Task Force is recommending additional members of the Task Force be appointed to represent segments of the LGBTQ+ community, women, people living with HIV, and sex workers to provide a broader spectrum of representation from the community.
